

# Lab Notes Aug 22, 2024

## How to access the lab homepage

1. Go to [math.tamu.edu](https://math.tamu.edu).
2. Under "Academics" at the top, click "Courses and General Info".
3. On the left side, click "Listing by Course".
4. Then find the link for MATH 152 Engineering Mathematics II.
5. Click on the "Python Lab Schedule" link to be taken to the Google sheet containing the lab schedule, links to the assignments, overviews, and templates.

## What you need to know

- The labs are intended to supplement what you are learning in lecture.
- You will work in groups, starting the second week of class (Aug 29, 2024).
- Each group will submit ONE printout (or PDF, depending on if we are using Gradescope for labs) and ONE ONLY.
- I will give about 20 minutes or so of instruction on the new lab assignment at the beginning of each lab.
- In whatever time remains, you can start working with your groups.
- If you do not finish by the end of the lab, you are expected to meet with each other outside of lab time to continue working on the assignment.

## How I will grade the labs

- Full credit if your solution is correct.
- Half credit if your solution is incorrect or incomplete, but there was an earnest attempt.
- No credit if the problem was unattempted, or your attempt was very far off.
